# Which is your MATHS ANIMAL?

## Worry

"I'm going to get it wrong. I know I am. Everyone will think I'm stupid"

## Confident

"Ha! That was pretty easy"

## Uncertain

"I don't hate maths but I didn't get on well in school. I'm really not sure how this will go"

## Successful

"I've done it, it wasn't as hard as I thought. I already knew quite a bit"

## Given up

"Why am I even here? I can't do any of this. I'll never pass so why bother trying"

## Fear

"Please don't ask me any questions. I feel funny and my paws are sweaty"

## Blank

"Nothing makes sense. I haven't learnt the last bit yet. Why are there so many things to learn? I want some lettuce"

# Which MATHS ANIMAL Can you become?

## What will I be?

"Moving forwards"

**I currently feel...**

**I would like to feel...**

## My areas of challenge are:

What about; working out change quickly, percentages

## My areas of confidence are:

What about; handling money, weighing things out, measuring
